## 1)verificação de @ no email:

delimiter \$\$
drop trigger if exists emailArroba\$\$
create trigger emailsArroba before insert on Usuario for each
row
begin
declare ret int;
SELECT INSTR(new.email,'@') into ret;
if (ret = 0) then
SELECT 0 FROM `EMAIL NAO POSSUI ARROBA` INTO @error;
end if;
end\$\$
delimiter;

INSERT INTO `Usuario`(`nome`, `email`, `senha`, `AdmStatus`) VALUES ("Pedro", "pedrogmail.com", "3124", false);

2)Controle do valor de encomendas:

delimiter \$\$
drop trigger if exists controle\_locacao\$\$
create trigger controle\_locacao before insert on Locacao for each
row
begin
if (new.valor < 200) then
SELECT 0 FROM `Valor muito baixo` INTO@error;
end if;
end\$\$
delimiter;

3) Verificação de Endereço:
delimiter \$\$
drop trigger if exists controleUser\$\$
create trigger controleUser before insert on Endereco for each
row
begin
if (new.bairro="|| new.cidade="||new.estado="||new.rua=") then
SELECT 0 FROM `FAVOR PREENCHER TODOS OS CAMPOS` INTO@error;
end if;
end\$\$
delimiter:

INSERT INTO `Endereco`(`estado`, `cidade`, `bairro`, `rua`, `numero`, `usuario`) VALUES ("Parana", ", "palmital", "Rua 2", 3201, 4)
